

# Satellite Industrial

## Orange County, FL

Satellite Industrial is a small industrial site in Orlando, FL. We worked on for them to attempt to vacate a ROW adjacent to their property that was not being used by the county or others. This was to expand their site and maximize the use of their business in this area. Services included design & permitted through Orange County (small scale

comprehensive plan amendment, rezoning, PSP & Construction Plan & Engineering Design Report), SJRWMD (environmental resource permit) & FDEP (Water & Sewer).
