

Gordon Food Service

Altamonte Springs, FL

This 15,600 square foot store is the second entry into the Central FL market for a very successful food distributor from up north. The team led by a highly qualified architectural company returned to us to help them through the local approval process. This store was a remodel/retrofit of an old Circuit City store that had been left vacant for years. Services included design of the site, including ADA compliance design, grading, sanitary sewer lift station design & landscaping. Entitlement was through the City of Altamonte Springs (Site Plan, Sanitary).
