Courtesy Acura is the sister site of the Honda store, and this luxury brand required less volume, but more attention to detail. This dealership had to be planned around large overhead electric transmission lines that covered much of the site. Being in a closed basin added to the complicated design constraints, which were overcome to provide a well functioning dealership and a smooth buying experience for the customers. Services included entitlement through Sanford (Construction Plans), Seminole County (ROW), the SJRWMD (Storm Water), and FDEP (Water & Sewer).

Filled role as project manager with previous civil firm.
