

PORSCHE of N. Orlando

Seminole County, FL

Porsche of North Orlando was designed on an infill property near the gateway into Orange County. A high profile dealership with strict corporate standards for more than just the product, this site's design had to account for the historical drainage problems of much of the surrounding area. Services included entitlement through Seminole County (Construction Plans), FDOT (ROW), the SJRWMD (Storm Water), and FDEP (Water & Sewer). Filled role as project manager with previous civil firm.
