- Permitting
- Construction Administration

Lake Reams Town Homes in Orange County is an existing condo development which the owner decided, due to market pressures, to convert into a town home development. The client wanted us fit their current town home product into an area not built out.

We performed the conceptual planning services and grading design to ensure the product could fit within the existing parking facilities. Connections were made to existing water, sewer and storm water utilities. Permitting through Orange County, FL.
